

August 29, 2005

Dear Homeowner,

As stated in the clean letter you received from the EPA after your yard was remediated, PRI a contractor of the EPA is preparing to conduct lead based paint assessments of the exterior paint on your property free of charge.

This assessment is being performed to protect the soil remediation performed in the last couple of years. This letter is notification you will be contacted by one of the following contractors: Strata Environmental Resource or North East Denver Housing Center. There is no guarantee the lead paint will be abated; however an assessment will be needed to determine if the structure on the property qualifies under the EPA guidelines.

If you are a new property owner or have further questions please contact us directly at (303) 487-0377 to discuss the project in further detail.

Sincerely,

Meagan Redfern
Site Coordinator
